- PHP
- OS X, Windows, & Linux
- Web Site/Email Design
- Web Site Strategy & Analytics
- OO Design and Analysis
- Responsive Website Design
- Git/GitHub
- UI Development
- Visual Studio/Eclipse/IntelliJ
- Dreamweaver & Photoshop

### Experience

NAU Marketing (Flagstaff, AZ)  
NAU ITS (Flagstaff, AZ)

**Associate Web Developer**, 2015-Current  
**SW-Learning and Professional Development**, 2012-2014

Worked full time during summer breaks to gain experience in Web/UI development and design.

#### **Projects & Results:**

- Used an Agile workflow and Object Oriented design to create web based software for the university.
- Leveraged Git to work and collaborate in multiple development environments for the NAU 2.0 website.
- Various web development in HTML, CSS, and Javascript.
- Developed web applications in .NET as a team, to solve problems and meet the needs of our users.
- Provided break/fix support on all existing web pages pertaining to NAU's current website.
- Design and Implementation of web/email forms to satisfy the needs of our users.
- UI/UX exploration and development in a web setting that could provide new and easier functionality within our current CMS.
- Worked in a team to provide information and learning on any/all software that pertains to NAU, while creating and editing multiple tutorials for end users for university applications, operating systems, and internet communications applications.
- Various team based tasks from creating and editing how-to's, to editing and implementing web presence via Ektron CMS.
